

Mathematics Department Highlights March 2010

As the date for the Mathematics portion of the MCAS draws closer, teachers and staff have been working to prepare and support the students here at Foxborough Regional Charter School. In addition to the usual integration of MCAS preparation into everyday learning, a Math MCAS Preparation Program will be taking place for grades 3-8. This program is scheduled afterschool from 3:15pm to 4:15pm twice a week starting March 22nd and will end May 10th. Parents of students in grades 3-8 can expect to receive a letter containing more information along with an application and transportation forms attached. Any and all are welcome to apply, however there is limited space so the needs of the students will be taken into consideration when selecting those to take the course. For more information, please contact: Christopher Barb (cbarb@foxboroughrcs.org)
